Thank you for your purchase! If you have any questions that you feel should have been in this document, please log in using the account used to purchase the file and email via my user profile page contact form there. Thanks!

For questions on basic HTML, JavaScript or CSS editing - please give your question a quick Google or visit W3Schools as theme issues get top priority.

Version 2.0

Requirements

Please ensure your web host meets the application requirements. The lists of requirements are:

Web Server Requirements

- Operating System: Linux, Unix, or Windows
- Web Server: Apache
- Scripting Language: PHP 5.3 or above
- Apache mod_rewrite
- Php GD library
- Database: MySQL 5.1 or above (PDO driver enabled)

If you're unsure whether your server meets these requirements, simply ask your hosting provider.

Install

Unzip the Car Dealer Pro package into your local hard drive. If you don't have WinZip, you can download it for free **here**.

Using an FTP program (such as Filezilla, which is free, or a commercial package such as CuteFTP), login to your web server and copy the Car Dealer Pro files across into your base website directory. This directory is commonly called 'public_html', 'html', 'www' or 'httpdocs'. If you're not sure what it is, your webhost provider will be able to tell you.

Web Server Requirements

Freelance Manager requires the following files/directories to have 'write' permissions set. If you're running on a Linux or Unix web host, you can use your FTP program and use the 'CHMOD' ('Change Mode') function to grant writes permissions.

If your host is running Windows, you will need to contact your hosting provider about setting up write permissions on these files/folders.

Folders, CHMOD these to755:

- /uploads/
- /themes/master/cache/
- /admin/backups/

NOTE: ALTHOUGH IT SAYS 755, SOME WEBHOSTS MAY REQUIRE 775 OR 777 INSTEAD.

MySQL Database

Car Dealer Pro makes use of a MySQL database to store your data. This database must be created before you run the Car Dealer Pro installation wizard. Your MySQL user account should also have full grant access to that database.

You will need the database connection details during the setup wizard.

Setting up your database may differ with your webhost and what software they use for your web hosting control panel. If you don't know how ask your hosting provider.

Setup Wizard

Car Dealer Pro includes a simple 3 step installation process. To start the setup wizard, navigate to the directory that you uploaded Car Dealer Pro, for example: http://www.example.com/.

The Car Dealer Pro setup wizard will appear. Follow simple on screen instructions.

About

Car Dealer Pro is highly customizable, open source and user friendly car dealer script that allows you to manage your vehicle inventories. Car Dealer Pro is an absolute must for car dealerships or car classified websites. It provides auto dealers and site owners with an Admin Panel that gives you full control over the content and car listings. Car Dealer Pro is user friendly, fully functional and easy to use.

Features

- Fully Responsive
- View vehicle statistics
- List and grid view
- View vehicle details

- SEO Optimized
- Simple Content management System
- F.A.Q. Manager
- Slider Manager
- Over 5000 car makes and model database included
- Multilingual Support
- Multiple dealerships supported
- and many more...

Setting up VIN Search

In order to use VIN API, you will need to create FREE account (for now) at
https://secure.mashery.com/login/edmunds.mashery.com/

Once you receive your ID go to Admin Configuration page and enter it under **VIN API ID.** Now you will be able to use VIN feature of Car Dealer Pro.

Custom URL slugs

You can change default URL slug, by modifying constants located in init.php.
Look for:

```
/* Url Slugs*/
```

```
define("URL_LOGIN", "login");
define("URL_REGISTER", "register");
define("URL_ACCOUNT", "account");
…
```

For example to change default account page url from:

http://domain.com/**account**/ into http://domain.com/**dashboard**/
replace:
define("URL_ACCOUNT", "**account**");
with:
define("URL_ACCOUNT", "**dashboard**");

Setting up CronJob

Make sure to set up a cronjob on /cron/cron.php. Run it every day just before midnight. Cron job will automatically remove expired listings, memberships etc…
If you don't know how to use CronJob, please contact your hosting company.

Upgrade from previous version of Car Dealer Pro

Please note that there is absolutely no way to upgrade from prior CDP version due to massive changes in database and file structure.

Sources & Credits

The images included in preview are for demonstration purposes only. Some photos can be purchased separately. (If needed, particular links can be given at your email request).

In downloaded product folder placeholders might be used instead of real stock images.

Thank you so much for purchasing this script!

Regards,
